

Anthony Magdalena

WEB & UI DESIGNER · BRAND SYSTEMS

Portfolio: onyxmode.co
(619) 706-2414 · onyx.anthony@icloud.com
San Diego, CA · Remote-ready

Web and UI designer who takes client projects from brand to built site: logos, brand guides, design systems, responsive mockups, and the final coded pages. I run a one-person studio, so I design the interface and then build it, which means my mockups are always developer-ready because I am the developer on the other side of the handoff. Strong on visual fundamentals, comfortable balancing usability, accessibility, and performance, and fast at picking up any tool a team runs on.

SELECTED WORK

Pacific Drive Co. — car rental booking site · UI design + build, 2025

- Designed and built a responsive rental site: vehicle cards, a date-picker booking flow that calculates per-car totals, and per-vehicle checkout
- Balanced a clean visual design against real functional needs (booking logic, payment handoff, mobile layout)

Real Estate Brand Overhaul · identity + web redesign, 2024

- Delivered a full rebrand for a real estate client: brand identity system, website redesign, and content direction
- Set the visual language (logo, color, type) and carried it consistently across every page

ONYX — studio brand system & site · design system + site, ongoing

- Built a complete brand system from scratch: logo, locked color palette, typographic scale (Fraunces / Inter), and a written voice guide
- Designed and shipped the studio site at onyxmode.co, including a full redesign and migration

CORE DESIGN SKILLS

- Website & UI design (desktop and mobile)
- Wireframes, mockups, and design systems
- Brand identity: logos, brand guides, visual language
- Responsive, accessibility-minded layout
- Web graphics, icons, and visual assets
- Design-to-code and developer-ready handoff
- Client collaboration and creative briefs
- Motion and video (product and promo)

TOOLS

Design & front-end: HTML, CSS, JavaScript; responsive design; component/design-system thinking; AI-native design and image tools (Freepik, generative image workflows)

Motion & media: DaVinci Resolve (video and motion), audio production (15+ yrs)

Build & collaboration: Netlify, GitHub Pages, Git, Google Workspace; expanding fluency in Figma and the Adobe suite

EXPERIENCE

Founder / Designer & Developer — Onyx Studio

San Diego, CA · 2024 to Present · booked a paying client roster from zero within 60 days

Music Producer & Audio Engineer — Self-employed / OneOfUs Productions

San Diego, LA, Antwerp · 2008 to Present · self-taught technical craft; released records and client albums

Sales & Service — Nordstrom (top 3 in dept.) · Customer Service — Sprouts (current)

San Diego, CA · client-facing communication and reliability

EDUCATION

LA Film School — Film Production Studies, 2016 · Community college coursework, San Diego (4 yrs) · Self-directed design & web development, ongoing
