Creative director who bets on the right models — not all of them. The approach is intentional: select for efficiency, protect the creative process, keep the human in the loop. AI amplifies the work, it doesn't replace the judgment behind it. Built a paying client roster from zero in under 60 days — no team, no funding, no waiting. Available immediately for full-time, contract, or freelance roles in creative direction, marketing, and AI-native content.
